This is in response to the January 12, 2007 inquiry on the property located at 1614 9th Street NW. This property was initially inspected on December 13, 2006 and was found to have violations, including trash and debris. The property was reinspected on January 8, 2007 and was forwarded to the lead inspector for the Office of Administrative Hearings for review on January 10, 2007. As a result of DCRA's persistence, all trash and debris have been removed from the property. Further, conversation with Investigator Phillip Miller confirmed that the property has valid building permits and the owner is actively renovating the property. DCRA appreciates any and all information about vacant nuisance properties so that we can bring them all up to code as quickly as possible.
